

NEW PRODUCT RELEASE

TRANSFORMERS

Bourns Releases New Push-Pull Isolation Power Transformers

Model SM91207L and SM91208L

Riverside, California – April 19, 2024 – The Bourns Magnetics Product Line is pleased to introduce the new Model [SM91207L](#) and [SM91208L](#) Push-Pull Power Transformers. These compact size, high voltage isolation transformers are driven by 24 V input (SM91207L) and 12 V input (SM91208L), delivering 15 V up to 500 mA output. They can be configured in a variety of turns ratios.

These new transformers are designed to support isolated interface power for CAN, RS-485, RS-422, RS-232, SPI, I²C, and lower power LAN, and developed for use with Texas Instruments Model SN6507. These products meet IEC/UL 62368-1 requirements.

These power transformers feature functional insulation and a working voltage up to 400 VDC, Hi-Pot isolation voltage up to 2500 VAC and an extended operating temperature range of -40 to +125 °C.

Model	Input (V)	Primary Inductance (μH)	Size (mm)	Working Voltage (V)	Creepage Distance (mm)	Clearance Distance (mm)
SM91207L	24	430	13.2 x 11.8 x 11.6	400	Min. 2	Min. 2
SM91208L	12	130	13.2 x 11.8 x 11.6	400	Min. 2	Min. 2

Should you have any questions, please contact [Bourns Customer Service/Inside Sales](#).

Features

- Compliant with IEC/UL 62368-1 standards
- Functional insulation for working voltage up to 400 VDC
- Hi-Pot voltage up to 2500 VAC
- Designed for isolation power supplies using TI Model SN6507
- RoHS compliant*

Applications

- Photovoltaic inverters, protective relays, factory automation, low/medium risk medical equipment**.
- Motor drivers: IGBT and SiC gate driver power supplies
- Isolation power supply for Controller Area Network (CAN), RS-485, RS-422, RS-232, SPI, I²C, low-power LAN

* RoHS Directive 2015/863, Mar 31, 2015 and Annex.
